Redevelopment of the Taverna del Ferro settlement

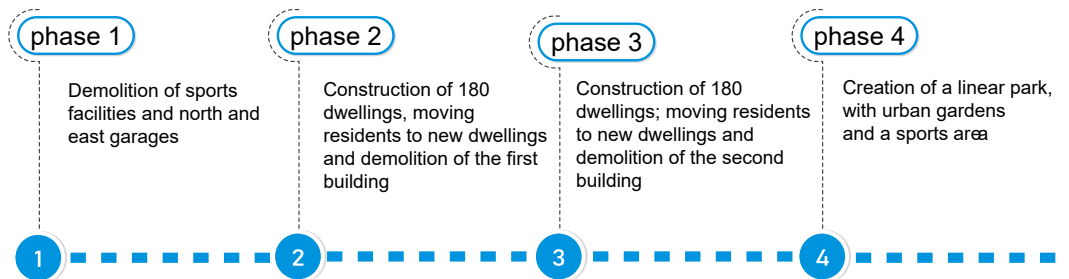

The project

Demolish the two “blocks” and replace them with 28 low-rise, energy-self-sustainable buildings, with public spaces equipped for play and sport, urban gardens and new local services. This is the project of the Municipality of Naples that will change the image of Taverna del Ferro and give its inhabitants a more liveable neighbourhood. The project will cost €106 million and is mainly funded by the NRRP and PON Metro programmes.

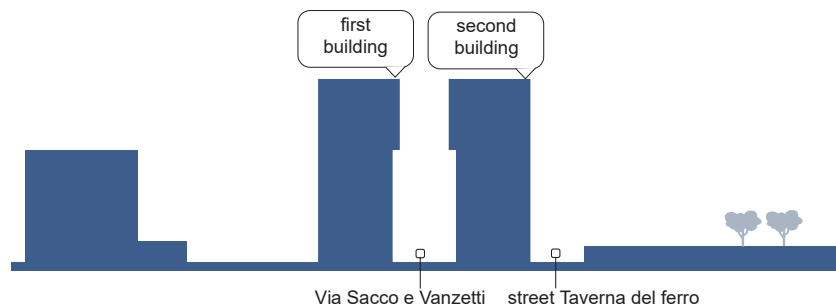

The worksite

The activities will take place while the neighbourhood is still inhabited. The buildings will be demolished and rebuilt while, just a few steps away, families will continue to go about their daily lives. This coexistence may cause some inconvenience, but it offers citizens a great opportunity for civic monitoring of the works.

Not only stones

The project involves social support for redevelopment with neighbourhood services and spaces for discussion, implemented through co-design with local associations.

The beneficiaries of the new homes

The new dwellings are being built to replace the current houses; for this reason, they are intended for the same people who currently live in Bipiani. Those who are not currently eligible for allocation will be able to join a special programme to obtain temporary accommodation for a period of three years. During the three-year period, the Municipality of Naples will monitor the possession of the criteria required.
