

PIAZZA GARIBALDI - PLANIMETRIA DI INSIEME

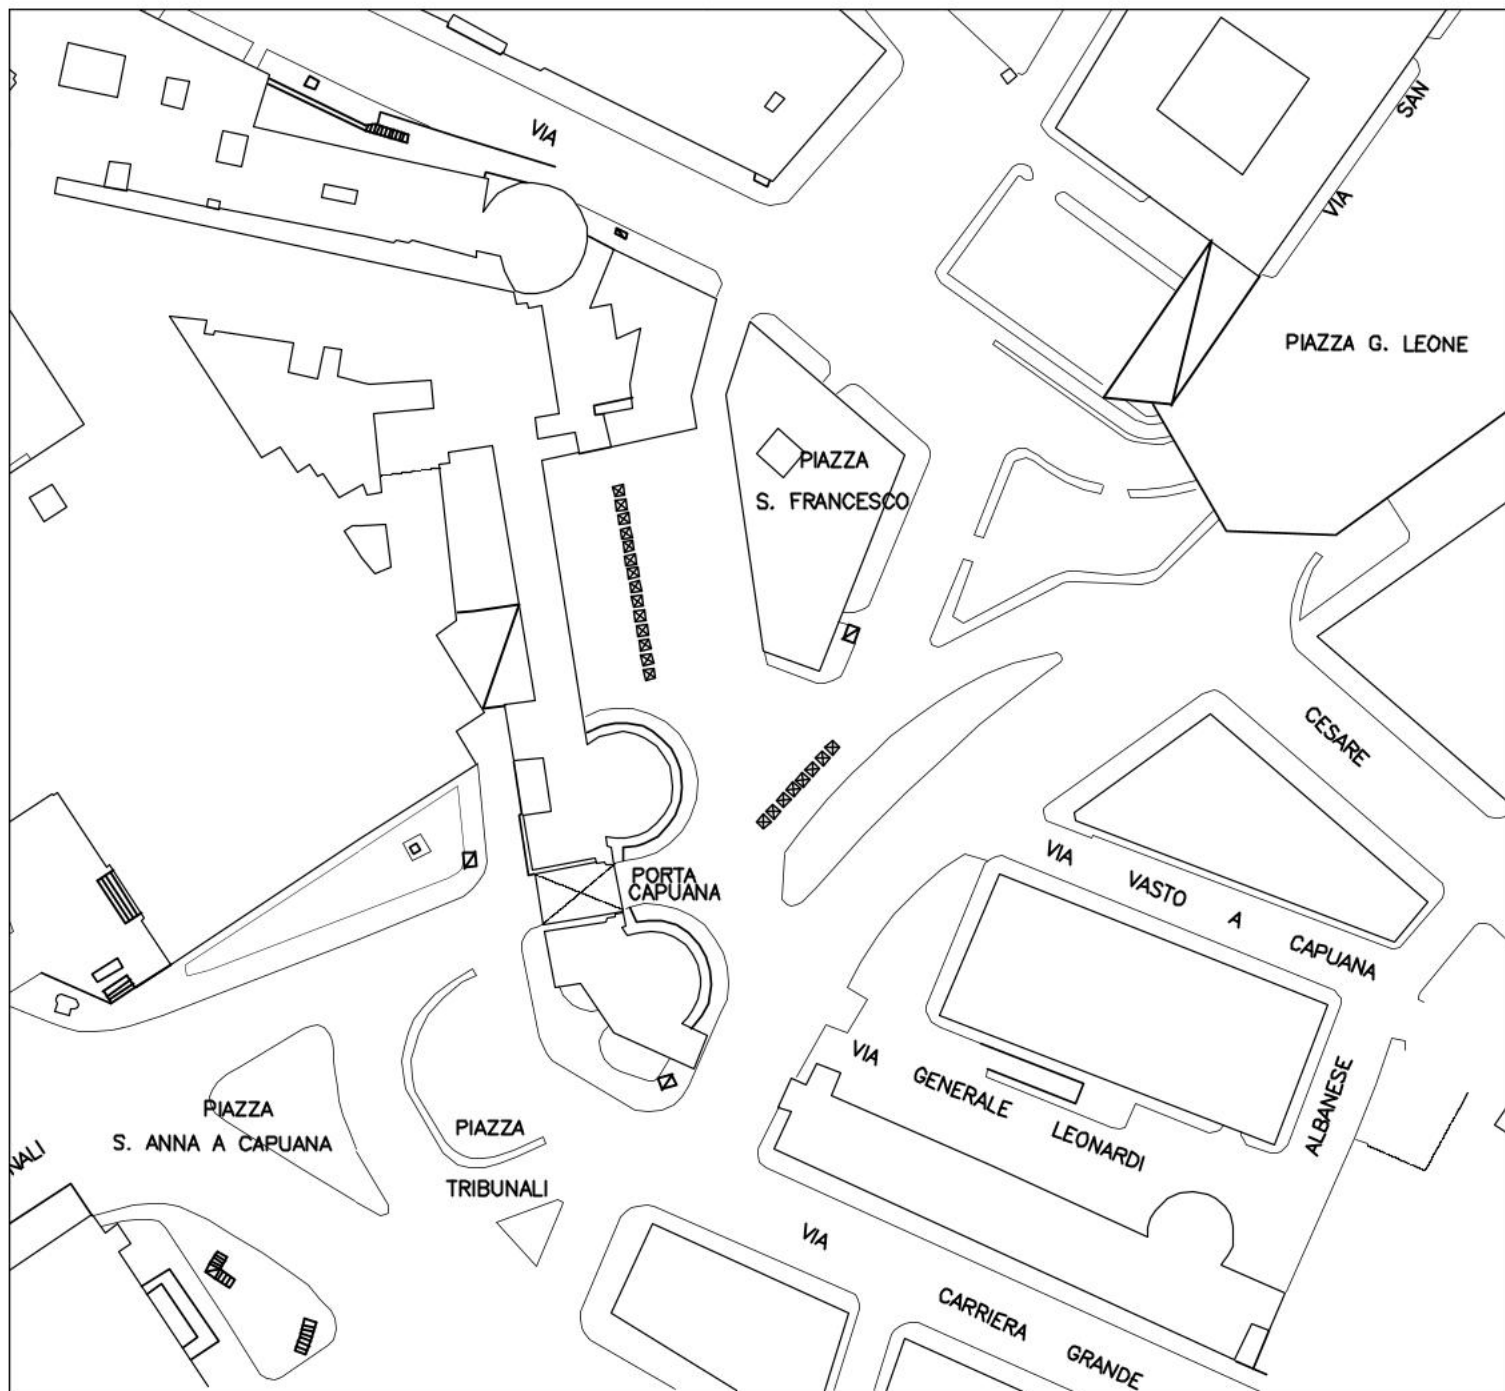

PIAZZA  
PRINCIPE UMBERTO

This is a black and white architectural site plan of Piazza Principe Umberto. The plan shows the irregular shape of the square, which is roughly rectangular but with several protrusions and indentations. The square is divided into sections by curved lines, likely representing pedestrian paths or landscaping. Along the right and bottom edges of the square, there are several small, rectangular structures with diagonal hatching, representing market stalls. The surrounding area is filled with the outlines of various buildings, some with complex, stepped profiles. The text 'PIAZZA PRINCIPE UMBERTO' is centered in the upper half of the square.
